

Custodial Operations Policy and Procedures

6.7 Condoms and dental dams

Policy summary

Inmates must have access to free condoms (for males), dental dams (for females), and lubricant through dispensing machines installed in NSW correctional centres, and/or by other means permitted by the governor.

Any inmate misusing or improperly disposing of condoms or dental dams may be charged with a correctional centre offence.

Management of Public Correctional Centres Service Specifications

Service specifications	Decency and respect Safety and security
------------------------	--

Scope

This section applies to all correctional centres and other facilities administered by or on behalf of Corrective Services NSW (CSNSW).

It also applies to all CSNSW employees, and where relevant to other personnel such as Justice Health and Forensic Mental Health Network (JH&FMHN), contractors, subcontractors, and visitors.

1 Condoms and dental dams

1.1 Supply of condoms and dental dams

To minimise the risk of Human Immunodeficiency Virus (HIV) and other sexually transmitted infections, inmates must have access to condoms, lubricant and dental dams.

Under clause 59 of the *Crimes (Administration of Sentences) Regulation 2014*, inmates must have access to condoms, lubricant, and dental dams free of charge through dispensing machines installed in the centres, and/or by other means permitted by the Governor.

Condoms and dental dams must be available to inmates without interference of any kind. Any physical barrier or threat of intimidation by any person is deemed unacceptable and must be dealt with in the appropriate manner.

Inmates who deliberately or maliciously damage the dispensing machines or the products in it, or who physically prevent, or threaten or intimidate another inmate in regard to accessing a dispensing machine or its products may be dealt with as though they have committed a correctional centre offence (**refer to COPP section 14.1 Inmate discipline**).

These products are provided to inmates in cardboard packages containing one dental dam (for female inmates), or one condom (for male inmates), one packet of lubricant, one zip lock bag for disposal, and an information card on the proper disposal method for the condom or dental dam.

Inmates must place any used condoms or dental dam in the disposal bag, and then in the original cardboard package, which is to be disposed of by the inmate into the domestic waste.

Condom, lubricant and dental dam supplies must be ordered from Corrective Services Industries (CSI) at Wellington Correctional Centre Technology and Assembly Business Unit by email to Welcctech1@dcj.nsw.gov.au. The CSI staff at this unit may be contacted on (02) 6840 2898.

1.2 Procedures for supplying condoms and dental dams

	Procedure	Responsibility
1.	Implement a Local Operating Procedure (LOP) setting out procedures for ordering and regular checking/stocking of condom/dental dam supplies, and authorised officers responsible for these procedures. In centres without a CSI Industries Manager, the Governor will authorise another officer to be responsible for ordering supplies.	Governor
2.	Order condom/dental dam supplies.	CSI Industries Manager/ Authorised officer

1.3 Misuse or improper disposal of condoms and dental dams

Inmates may be charged with a correctional centre offence, for improper disposal or misuse of a condom or dental dam, including:

- filling a condom with water or any other fluid or material
- using condoms/dental dams as a weapon or projectile against any person or property
- using condoms/dental dams to conceal contraband on either their person, property or cell area
- infecting or threatening to infect or contaminate another person with the contents of a condom/dental dam
- not properly disposing of used condoms/dental dams within a reasonable amount of time after use
- flushing condoms/dental dams down the toilet or sewerage system
- leaving a used condom/dental dam in a place where others may come into contact with it.

Officers are to immediately report the improper disposal or misuse of a condom or dental dam to the Governor in writing.

To avoid risk of infection, officers must ensure that they wear gloves if disposing of a used condom/dental dam or handling it as evidence. Officers who have open cuts or grazes and are not wearing gloves may be placed at risk.

If the incorrect disposal of a condom or dental dam places staff or inmates at risk of infection, or an inmate threatens to use a used condom/dental dam against a person, this is to be treated as a deliberate attempt to infect other people with a sexually transmissible infection, and the inmate may be placed in segregation. Such behaviour may result in the inmate being charged with a correctional centre offence or reported to the NSW Police.

1.4 Procedures following misuse or improper disposal of condoms and dental dams

Governors must ensure that procedures in **COPP section 6.5 Infectious and communicable diseases** are implemented by staff and inmates involved in an incident with exposure to blood or body substances.

If the incorrect disposal or misuse of a condom or dental dam places staff or other inmates at risk of infection, or an inmate threatens to use a used condom/dental dam against a person, the following procedures must also be implemented:

	Procedure	Responsibility
1.	Wear latex gloves and place condom/dental dam in an exhibit bag.	Authorised officer
2.	Prepare a <i>Misconduct Report (refer to COPP section 14.1 Inmate discipline)</i> and immediately report the misuse of condom/dental dam to the Governor in writing. Both the report and exhibit should be given to the Governor.	Authorised officer

	Procedure	Responsibility
3.	Submit a report as soon as possible to the relevant Director, Custodial Operations detailing the misuse/improper disposal of condom or dental dam.	Governor
4.	Report the matter to the Assistant Commissioner, Custodial Corrections.	Director, Custodial Operations
